

# oil furnaces

keeping families warm for more than 60 years

## Reliable, Efficient Home Heating:

- Variable Speed Technology
- Easy Installation & Maintenance
- Optional Cooling Up to 5 Tons

### Lowboy

BCL, BFL, BML, BMLV  
59,000 - 237,000 BTU

### Highboy

HML, HMLV, HTL, HTLV  
59,000 - 113,000 BTU

### Multiposition

WML, WMLV, MPL  
59,000 - 128,000 BTU

# Olsen Home Heating Economics 101

An oil furnace uses two energy sources, oil to produce heat and electricity to power the fan motor but there's more to consider than just that.

FEATURE:	BENEFIT:	ADDITIONAL BENEFITS:
<b>OIL COSTS</b>		
<b>Higher Olsen AFUE Ratings</b> (Annual Fuel Utilization Efficiency)	<b>= Lower Fuel Costs</b>	<b>+ Bonus Cash Back</b> (Through energy efficiency rebates).*
<b>ELECTRICITY COSTS</b>		
<b>Olsen Variable Speed Technology</b> An oil furnace with an ECM (Electronically Commutated Motor) can reduce electricity consumption up to †80%.	<b>= Lower Electric Costs</b>	<b>+ Bonus Cash Back</b> (Through energy efficiency rebates).*
<b>OTHER COSTS AND CONSIDERATIONS</b>		
<b>DIRECT VENT SIDEWALL</b> <b>Olsen Direct Sidewall Venting</b> As homes age, the chimney can become costly to maintain or repair.	<b>- Eliminates Chimney Costs</b> <b>+ Increases Combustion Efficiency</b>	Requires only one wall opening, an Olsen Direct Sidewall Vent Kit (includes all connections from the furnace) and an Olsen concentric vent.  (The Olsen vent terminal utilizes a two-pipe combustion air/exhaust gas configuration. Outside air is used for combustion resulting in greater efficiency and safety. The burner provides the necessary pressure for venting of flue products – no additional motors or controls are needed).
<b>Superior Heat Exchanger Design</b>	<b>+ Delivers Higher AFUE</b>	Double Pass Heat Exchanger (Heavy-gauge construction and large surface area maximize heat transfer) Dual Clean Outs (Provide easy access for quick, efficient routine maintenance)
<b>Service &amp; Maintenance</b> Equipped for easy service and maintenance.	<b>= Lower Costs of Good Design</b>	Features like the slide out blower tray on high-boy models provide technicians easy access to critical components. Full length rails eliminate annoying/time consuming remounting of blower and motor housings, saving time and money on service.
<b>Quiet Operation</b>	<b>= Better Quality Comfort</b>	Most high-boy and low-boy Olsen furnaces come standard with a vestibule which provides sound attenuation, reducing operating noise. The vestibule also provides added protection for the burner.
<b>Warranty &amp; Peace of Mind</b> Olsen furnaces are designed to provide years of trouble-free operation.	<b>+ Limited Lifetime Warranty (Heat Exchanger), 5 Years Parts</b>	

\*(Check with your local government agencies and/or utilities regarding the availability of rebates and incentives).  
†Individual savings may vary.

## Common Features:

### All Olsen Oil Furnaces:

- **Heat Exchanger** – Proven heat exchanger design featuring 100% welded construction for maximum performance. Large accessible clean out ports.
- **Radiator** – “Wrap-around” style for maximum heat transfer.
- **Insulation** – Spun glass and aluminum foil for “hand-cool” cabinet.
- **Burner** – Equipped with industry leading Beckett or Riello oil burners which include oil solenoid valve, PSC motor and solid state controls. Factory assembled, wired and tested. Ready to connect to fuel line.
- **Barometric Draft Control** – Included with all chimney vent models.
- **Blower** – Direct drive or belt drive type. Permanently lubricated, resilient mounted.
- **Blower Assembly** – Entire unit can be easily removed for servicing.
- **Filter Racks & Washable Air Filters** – Included with all models.
- **Alternate firing rates** to fit a wide variety of applications (alternate nozzles are field supplied).

Made in North America,  
Dunkirk, NY Plant.

## Additional Features:

### BCL/BCL-S/BFL Lowboy Models

- **Cabinet construction** – 22 gauge steel cabinet ensures strength and quiet operation. Access door easily removed to access enclosed burner & controls.
- **PSC Blower Motor** – Designed for heavy duty continuous operation. Thermally protected. Four-speed is standard with 1/2 HP direct drive models. Three-speed is standard with 1 HP direct drive models. Single speed with adjustable motor pulley is standard with belt drive models.
- **Controls** – (UTEC) Electronic fan timer is standard on all 1/3 HP and 1/2 HP models. (Honeywell or White Rodgers) Fan and limit control is standard on all 3/4 HP and 1 HP models.
- **Air conditioning** – Fan timer control is AC ready. Prewired fan center relay is standard on fan and limit equipped models with 1 HP direct drive blower.
- **Direct Vent Models** – Include Beckett AFII-150 oil burner with pressure switch system for proving airflow, intake air collar and vent adapter. Vent pipe kits sold separately.

### BML/BMLV Compact Lowboy Models

- **Cabinet construction** – 22 gauge steel cabinet ensures strength and quiet operation. Access door easily removed to access enclosed burner & controls.
- **PSC Blower Motor (BML Models)** – Designed for heavy duty continuous operation. Thermally protected. Four-speed is standard with 1/2 HP direct drive models. Single speed with adjustable motor pulley is standard with belt drive models.
- **ECM Variable Speed Blower Motor (BMLV Models)** – Maximizes air conditioner efficiencies, reduces electrical operating costs and enhances comfort with programmed ramp up and ramp down operation. Available on 1/2 HP direct drive models.
- **Controls** – (UTEC) Electronic fan timer control is standard on all models.
- **Air conditioning** – Fan timer control is AC ready.
- **Direct Vent Models** – Include Beckett AFII-85 or Riello 40BF3 oil burner with pressure switch system for proving airflow, intake air collar and vent adapter. Vent pipe kits sold separately.

### HML/HMLV/HTL/HTLV Highboy Upflow Models

- **Cabinet construction** – 22 gauge steel cabinet ensures strength and quiet operation. Access door easily removed to access enclosed burner & controls.
- **PSC Blower Motor (HML/HTL Models)** – Designed for heavy duty continuous operation. Thermally protected. Four-speed is standard with 1/2 HP direct drive models.
- **ECM Variable Speed Blower Motor (HMLV/HTLV Models)** – Maximizes air conditioner efficiencies, reduces electrical operating costs and enhances comfort with programmed ramp up and ramp down operation. Available on 1/2 HP direct drive models.
- **Controls** – (UTEC) Electronic fan timer control is standard on all models.
- **Air conditioning** – Fan timer control is AC ready.
- **Direct Vent Models** – Include Beckett AFII-85 or Riello 40BF3 oil burner with pressure switch system for proving airflow, intake air collar and vent adapter. Vent pipe kits sold separately.

### WML/WMLV/MPL Highboy Downflow/Horizontal Models

- **Cabinet construction** – 22 gauge steel cabinet ensures strength and quiet operation. WML/WMLV models may be factory equipped with vestibule compartment to enclose burner & controls. Vestibule compartment for WML/WMLV also available as an after-market kit for non-factory equipped units.
- **PSC Blower Motor (WML/MPL Models)** – Designed for heavy duty continuous operation. Thermally protected. Four-speed is standard with 1/2 HP (WML) and 3/4 HP (MPL) direct drive models.
- **ECM Variable Speed Blower Motor (WMLV Models)** – Maximizes air conditioner efficiencies, reduces electrical operating costs and enhances comfort with programmed ramp up and ramp down operation. Available on 1/2 HP direct drive models.
- **Controls** – (UTEC) Electronic fan timer control is standard on all models.
- **Air conditioning** – Fan timer control is AC ready.
- **Direct Vent Models** – Include Beckett AFII-85 (WML/WMLV) or Beckett AFII-150 (MPL) or Riello 40BF3 (WML) oil burner with pressure switch system for proving airflow, intake air collar and vent adapter. Vent pipe kits sold separately.
